

# HAWK MOUNTAIN SCOUT RESERVATION

## 2017 Additions and Improvements

### Welcome Pavilion and Operations Center

In early February, construction will begin on the Andrew Maier II Operations Center and the Weidner Family Welcome Pavilion.

The new structure will replace the old comfort station in the HMSR parking lot. The welcome pavilion will be 25' x 60' and will serve as a gathering place for arriving campers. It will feature water bottle filling stations, and will be equipped with a screen and projector.

The new operations center will be the central hub of camp customer service housing senior camp staff and featuring a reception area and 5 restrooms that will be open 24 hours a day.

This project will be completed by May 1, 2017.

### Sporting Arrows and Paintball

Thanks to a special gift from Don Moll at B&G Glass, sporting arrows will be added to the archery center at HMSR.

Sporting arrows are not only new to archery in Scouting, but also to the archery world in general.

Similar to clay target shooting, sporting arrows are centered around automatic target launchers that throw 10-inch diameter foam targets into the air.

And once the targets take flight.....It's on!!

Scouts will use special arrows and can even try to hit the disc with paintball guns!

### Other Improvements

So far, other improvements for 2017 will include: continued expansion of the mountain bike course, a new pool liner and pump house upgrade, Cub Scout STEM program
